to support the needs of our communities*

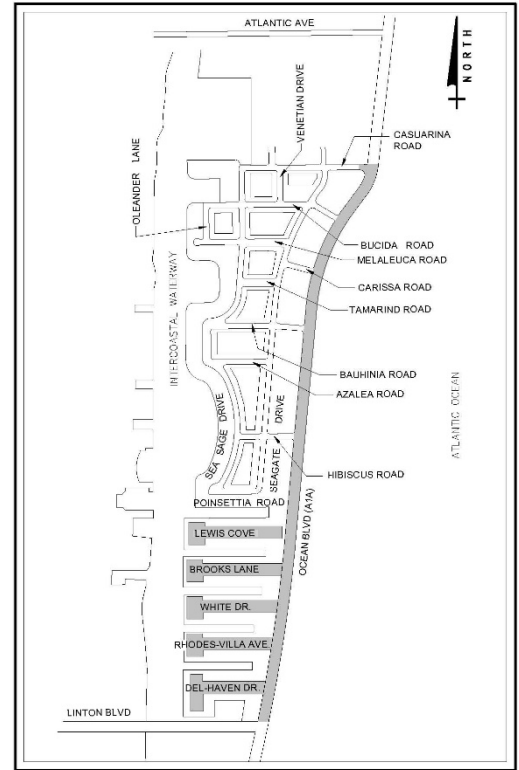

City of Delray Beach Reclaimed Water Expansion – Area 12C

The City of Delray Beach Public Works has plans to improve your neighborhood utilities. These upgrades include removing and replacing water mains, water services, sewer and storm drainage, and repaving the roadways. Lanzo Construction Company (General Contractor) and Mathews Consulting, Incorporated (Engineer and Construction Manager) have been contracted by the City to install these improvements.

The work is scheduled to start during the month of February and will be completed within eleven (11) months. Normal working hours for these improvements will be Monday through Friday, from 7:00 AM to 5:30 PM. There may be times throughout the project that work must occur at night or weekends to avoid water outages or to minimize traffic interruptions. Advanced notice will be given for any work outside of normal business hours. The project team will work to minimize any disruption.

During construction, there will be restricted traffic within the project area. In order to assure safe passage, Maintenance of Traffic (MOT) devices will inform motorists and pedestrians of areas where construction is taking place and provide alternate routes around the construction. Although work areas will be secured over night with a safety fence, devices and/or other safety precautions, residents should be as careful as possible while traveling through these construction zones. Please be aware that any damage to the roadway or private property will be repaired and restored to the same or better condition than prior to construction.

The team wishes to thank all residents for their support and understanding during the construction and completion of these important improvements. Should you have any questions or need additional information, please contact us below.
